PICTOGRAPHY

Class II appliance: appliance whose protection against electric shock is not only relevant to the main insulation, but also includes additional safety measures, such as dual insulation or reinforced insulation. These measures do not include ground devices as protection and do not depend on the installation conditions.

Class III appliance: appliance whose safety against electric shock is based on safe extra low voltage power supply. Compliance with legislation is guaranteed only if the appliance is powered by a SELV safety transformer/driver in compliance with legislation in force. The appliance must not be connected to ground conductors.

Degree of protection against access of foreign bodies, dust and water.

Appliance with this symbol can only use low pressure bulbs or bulbs with safety glass.

Do not use cold light lamps.

To prevent the risk of fire, maintain the minimum distance indicated from the bulb with lighting objects. This distance should be measured along the optical axis of the appliance to the closest lighting object.

Color Rendering Index: the degree of colour distortion under a given light source in comparison with a reference light source. The optimum colour rendition index is Ra = 100.

The luminous flux, measured in lumen, indicates the quantity of light perceived by the human eye emitted by a light source. In Davide Groppi lights with an integrated module, the delivered lumen flux is obtained from the photometric measurement. In lights with a lightbulb included, the luminous flux is indicated provided by the manufacturer of the lightbulb.

Luminaire designed to be powered by ENDLESS system at 48 V DC.

Luminaire integrated with Casambi, the Bluetooth Low Energy (BLE) technology for lighting control.

Luminaire with Extradark comfort system. The Extradark system associates an optical TIR PMMA lens to an element that geometrically shields the light beam viewing angle to obtain highly uniform lighting and full beam control. The polished black light shield is used to control the mirror reflection of the light, perfectly controlling the unified glare rating (UGR* < 19).

WIRELESS

35MM

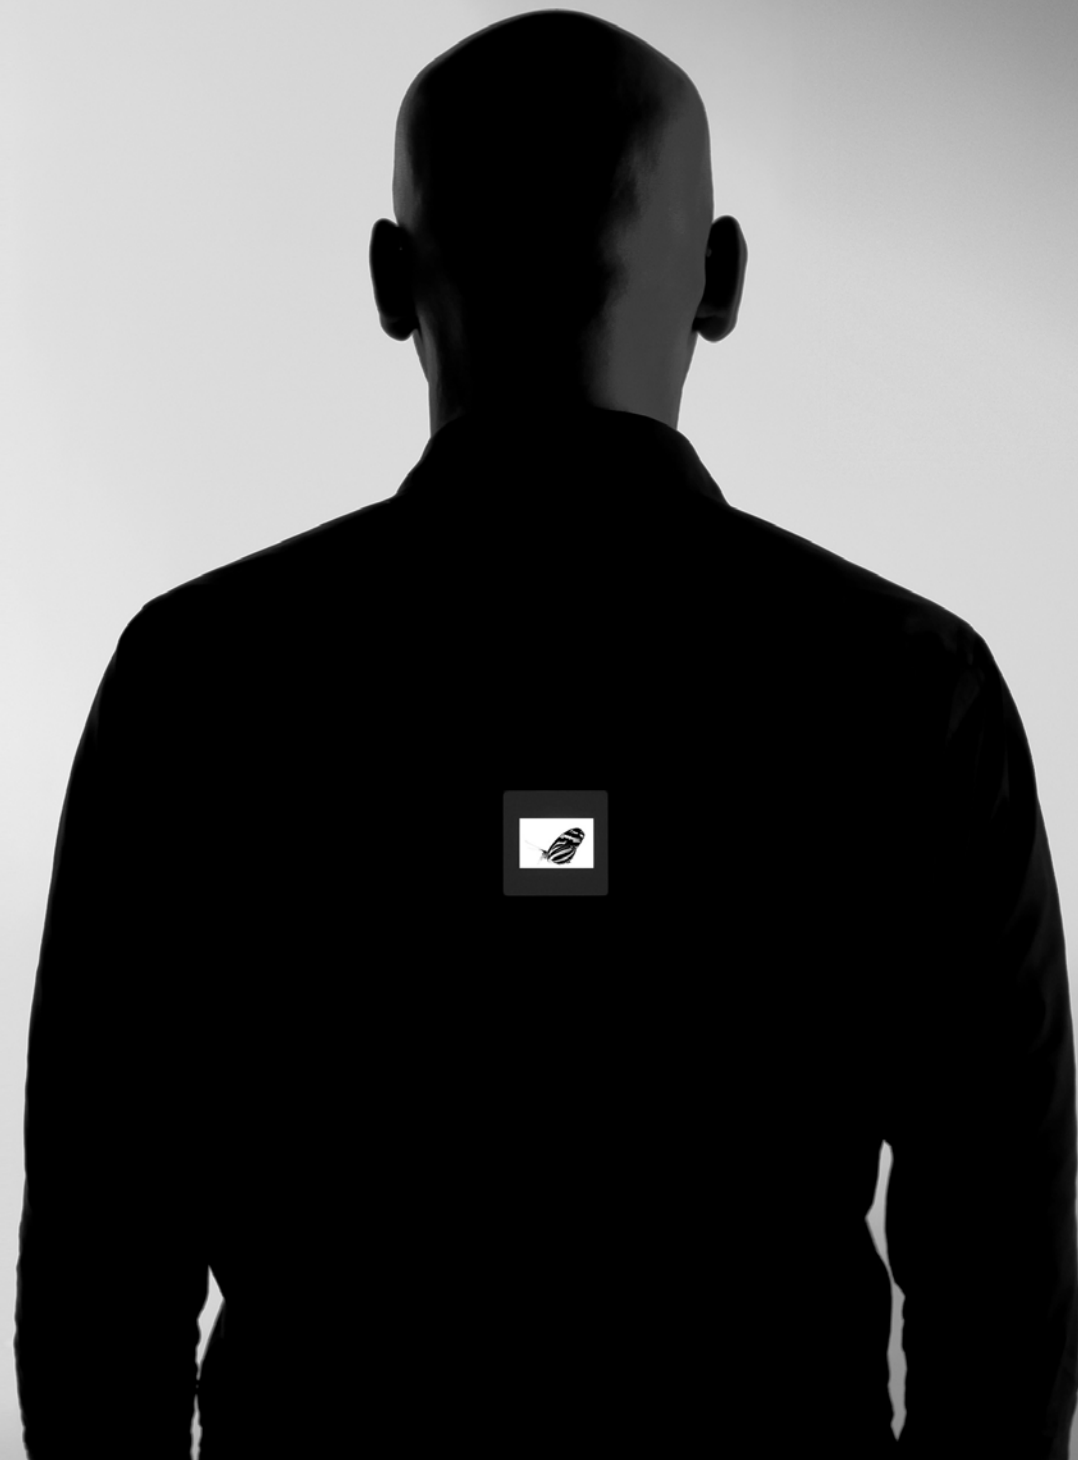

Alessandra Dallagiovanna - Davide Groppi / 2009

Those dear old slides. Nobody pays any attention to them anymore.

It's the smallest lamp in our collection.

It's an idea, a thought, a pendant, something you can wear.

The pulsating light and the images you choose to display on it
make 35MM unique and exceptional.

ANIMA

Davide Groppi - Giorgio Rava / 2021

A slender, light, ephemeral and abstract sculpture, it is a weightless ideogram. It's the emotion of an indirect light with an aesthetic poised between Scandinavian and Japanese design, two apparently distant cultures but, actually, very close.

At the top, an open circle, almost a hook for fishermen of the soul.

Selection for ADI Design Index 2022

AZ Award 2022

HASHI

Federico Delrosso / 2017

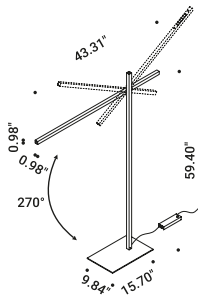

A floor lamp conceived to provide direct light in a simple and flexible manner.
Its principle component is the pivot point between two "chopsticks" (Hashi)
that serve as light sources which, positioned in different ways,
create a strong, graphic effect in space.
Particular care has been given to the proportions.
The sticks always appear lightweight and balanced.

ORIGINE

Davide Groppi - Giorgio Rava / 2020

From the Latin “origo”, start, birth, source. It appears like a bud emerging from the ground and soaring upwards towards the sky, a stem that becomes increasingly thinner. Mysterious and enigmatic, it combines the fascination of the unknown with the pleasure of a sophisticated and elegant ambient light. Origine sculpts and enhances every environment with its indirect light, which is intentionally non-invasive, graphic and fascinating.

Available in 3 different heights and in an outdoor version.

A special project, an authentic ready-made.
Obtained from a flexible fishing rod, it is a delicate and elegant sign,
which brings to mind the subtle branches of a willow tree
or bamboo canes floating on a light breeze.
Sampei is an unexpected gift, it is the magic of looking up, using light as a hook,
and being amazed by so much weightlessness.
The light is the fisherman's line, catching faces, gazes, people.
Available in 4 different heights and in an outdoor version.

CATHODE

Omar Carraglia / 2015

A scientific looking bulb made from mouth blown glass.
The shape brings to mind a light bulb that was never born. Think steampunk:
situations in which instruments were inspired by the rudiments of electricity.

The classic light bulb that has no future becomes
a wonderful device made of luminous diodes.
What would the past have looked like if the future had arrived first?
Luminaire designed to be powered by Endless system.

Suspension / Diffuse / Indoor

LOUIS XIV

Davide Groppi / 2023

Louis XIV is the freakiest letter of our light alphabet.
It's a disobedient design that translates a certain rebellion
to common lamp models into light.
I wanted to investigate the idea of the chandelier:
in line with our poetics, Louis XIV is the only possible solution
for lightness and irony.
Dimmable suspension lamp with dual emission.

Dual emission with separated switch luminaire.

MAGIA

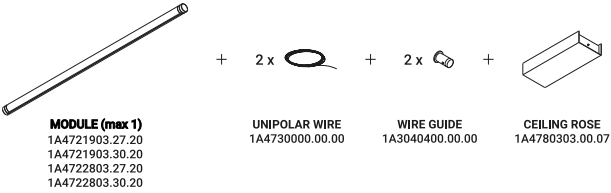

Michele Groppi / 2023

Light and transparency are the true stars of this project. We have always liked to think heretically, evoking mystery, magic and seduction. Magia is the new modular suspension lighting system that can be adapted to suit the different heights of the rooms and can generate direct and indirect light with the 360° adjustable module. In this case, the lens is not used to focus, but to modify the vision and perception of the object. The effect of the convex lens conceals the part of the light beam and produces the lightest effect of suspension and inconsistency.

MISS

Omar Carraglia / 2006

So slim and essential...
The fundamental concept of this project is minimalism.
A small tube that lights the table with wonder.
A real dual project: sign and light.
Luminaire designed to be powered by Endless system.

Suspension / Direct / Indoor

MOON

NEURO

Davide Groppi - Beppe Merlano / 2013

The idea is to bring light wherever you like, starting from a socket.
A simple project, almost a revival of the old electrical wiring.
A plug, a cable, some isolators, a socket and a LED.
Outdoor version available.
Design Plus Award 2014

SIMBIOSI

Davide Groppi / 2015

A de-structured chandelier that can be re-assembled as you like.
A conjuring trick that gives you the possibility of connecting the diodes in series
using very weak electric currents with wires that are practically invisible.
The very thin wire that connects the light sources and brings them alive,
one in relation to the other, is the principal component of this project.

SOTTOSOPRA

Davide Groppi / 2023

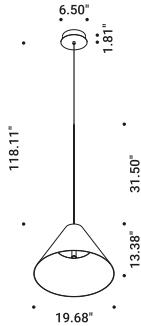

The purity of the suspended cone encases a small light machine that produces direct, indirect and diffused light at the same time.
Sottosopra: pure, elegant, wonderfully efficient.

Suspension / Indirect-Direct / Indoor

Material Metal

Finish .03 Matt White

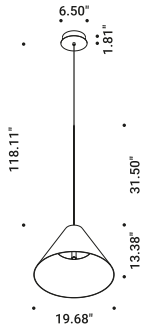

Note Dimmable suspension lamp with dual emission.

EDISON'S NIGHTMARE

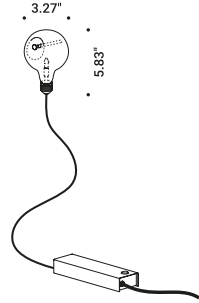

Harry Thaler / 2014

A gestural project, full of irony and nostalgia.
Therefore, among a thousand stories, prohibitions, absurd technical rules,
we have reached the end. The end of the incandescent bulb.
Edison's Nightmare is a salute to Edison's light bulb*, a dream that changed the way
we live forever, stealing time to read and write from sleep.
It is a classic light bulb, nailed to the wall. Like a work of art.
** From 01 September 2012, incandescent bulbs cannot be sold in the EU.*

EDISON'S NIGHTMARE

Harry Thaler / 2014

Wall / Diffuse / Indoor	
Material	Blown glass - Metal
Finish	.00 Standard

Standard - Dimmer on board

1A3380003.00.06

A luminous short film.

Telling a story in light, a series of old 35MM slides are lit from behind,
pulsating and shown at random.

The photographs can be assembled and replaced as you like.

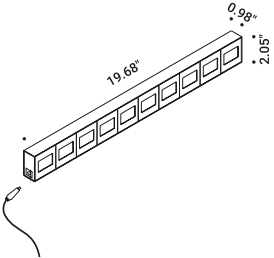

The choice of the message to be communicated is completely personal:
it can be an image, a logo, a sentence, anything you want to represent, at any time.

The light message is punctuated by a blinking LED, offering reading in movement.

Objects-Wall / Diffuse / Indoor

Material Metal - Polycarbonate
Finish .00 Standard

Note Slowly flashing lights luminaire - White luminous module - Black fixing structure - Customizable images not included - Modules connector included.

NULLA

Davide Groppi / 2010

An extreme expression of subtraction, uniting optics and electronics as an answer to the ultimate challenge: the absence of structural support and the essence of light.

Nulla is a project that represents both the beginning and end of our work on light. It's the beginning, in the sense that we have always been looking for absolute light, one coming from a distance, almost without a source. It's the end in that every time we look at Nulla, we feel as though we can't get it better than that.

Nulla generates light and propagates mystery. Nulla is the most generous of our lamps. Its sole objective is to hide and give all the attention to whatever it is lighting. What we see is only a tiny black hole, as if it were drawn on the ceiling.

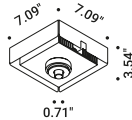

A circle in the ceiling hiding a very bright LED and lens to project the light.

ENDLESS

Davide Groppi / 2018

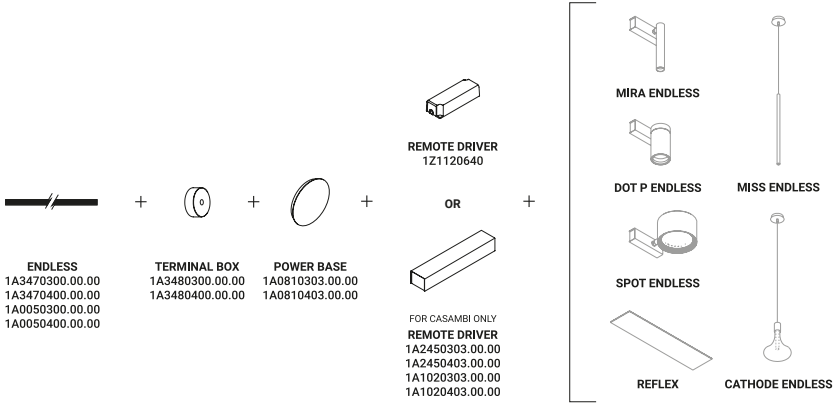

Absolute freedom, absolute spatiality, absolute creativity.
An adhesive tape that conducts electricity can be placed anywhere on walls and ceilings to power our lighting projects.

Endless is the system created and patented by our Team in order to transport electric energy in a digital and graphic manner.

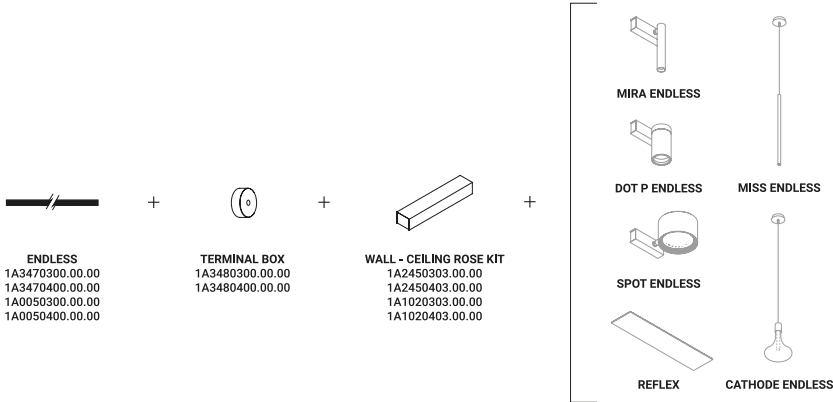

It's the idea of considering walls and ceilings like electronic circuits, where luminaires can be done fixed freely and easily. This system comes with various accessories to provide and manage the flow of electricity.

FLASH

Davide Groppi / 2017

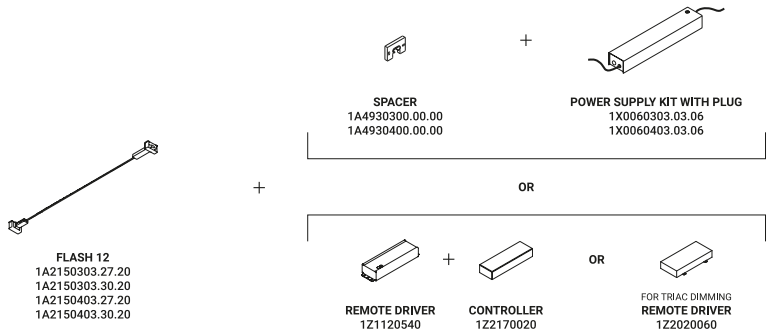

It is our Infinito model turned around, with the light flowing downwards. The 9 mm wide stainless steel strip can run perfectly up to 36 metres in length (standard versions at 6 / 12 / 18 metres in length).

The ideal solution for direct illumination of spaces with very high ceilings. Its name pays homage to the famous comic book superhero, who can run seven times the speed of light.

INFINITO

Davide Groppi / 2016

A spatial concept, it is continuous light.

An ultra-thin strip of special stainless steel just 18 mm wide "cuts" the space to produce indirect light. Infinito can be adapted to various situations, stretched from wall to wall or ceiling to floor. It comes in strips up to 36 metres in length (standard versions at 6 / 12 metres in length).

Infinito breaks down the luminaire, turning it into something else, leaving only a trace, a line and then not even that, just light.

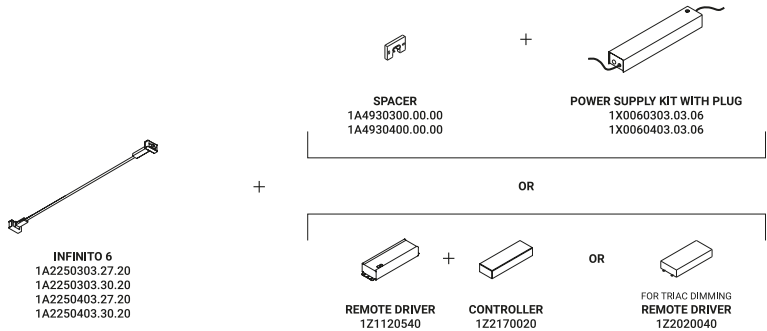

This project pays homage to the art of Lucio Fontana and his spatial concepts.

The graphic force of this system is surprising. It can be integrated into space, but at the same time it becomes part of that space. Infinito: essence and absence.

1A0340400.00.00 - 1A0350400.00.00 - Kit wall connection sloped 75°

Example of installation

Light runs on a wire. An almost imperceptible wire, suspended in space.

Like a tightrope walker on a thin rope, the light reaches everywhere, weightless and wonderful. Ohm is an electro mechanic project that takes maximum advantage of the characteristics of luminous diodes.

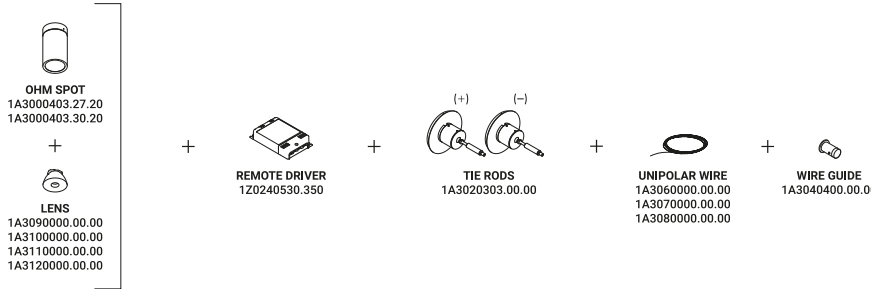

Its secret is a special unipolar wire stretched from wall to wall.

Where the light comes from is discreetly hidden, giving all the attention to what it is illuminating.

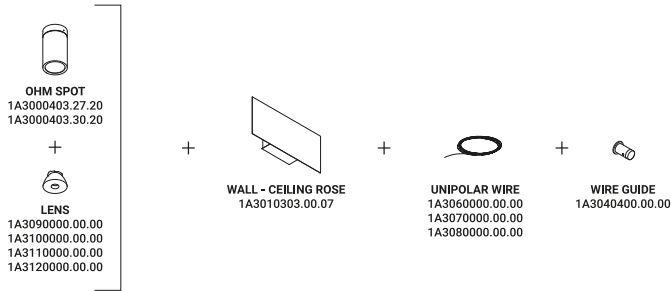

It is possible to replace the light source even with the luminaire assembled.

Utopia is a project on the limit state of light, the research for the minimum dimension necessary for pure and essential lighting.
It represents full flexibility, in both its design and its light control.
The light strip reaches into space, bending, breaking and drawing abstract, mysterious patterns.

ORIGINE OUTDOOR

Davide Groppi - Giorgio Rava / 2020

From the Latin "origo", start, birth, source.

It appears like a bud emerging from the ground and soaring upwards towards the sky, a stem that becomes increasingly thinner.

Mysterious, enigmatic but comfortable, it combines the fascination of the unknown with the pleasure of a sophisticated and elegant ambient light.

Origine sculpts and enhances every environment with its indirect light, which is intentionally non-invasive, graphic and fascinating.

Indoor version available.

SAMPEI 440 OUTDOOR

Enzo Calabrese - Davide Groppi / 2011

A special project, an authentic ready-made.
Obtained from a fishing flexible rod, it is a delicate and elegant sign,
which brings to mind the subtle branches of a willow tree
or bamboo canes floating on a light breeze.
Sampei is an unexpected gift, it is the magic of looking up, using light as a hook,
and being amazed by so much weightlessness.
Indoor version available.

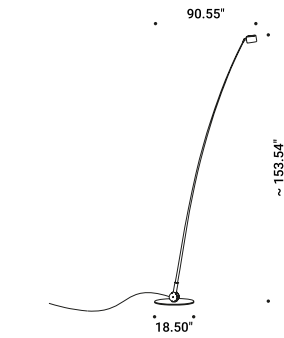

SAMPEI 440 OUTDOOR
