

Reminiscent of waking up, that magical instant just before you open your eyes completely, when the light barely filters, making everything indistinct as you pass from sleeping to being awake.

A metal cone positioned diagonally on its base creates an asymmetrical light.

Ricorda il risveglio, quel breve magico attimo, prima di aprire totalmente gli occhi, in cui la luce filtra appena, rendendo tutto indistinto nel passaggio fra il sonno e la veglia. Un cono in metallo, posizionato in obliquo sulla base, genera una luce asimmetrica.

PALPEBRA
