

# SLEEPER

GLOBAL HOTEL DESIGN

MAY | JUNE 2016

## Keemala

Boundary-pushing design comes to Thailand with a treetop wonderland in Phuket

## Space Copenhagen

The Danish duo on introducing their Scandinavian design aesthetic to New York

## Anantara Peace Haven

Anantara makes its Sri Lanka debut with a colonial inspired resort on the rugged south coast

**DAVIDE GROPPI**

Simbiosi

Simbiosi is about re-thinking the idea of a chandelier. Its design has been de-structured and can be re-assembled according to the aesthetic taste of the client. As a whole, Simbiosi appears weightless and almost inconceivable as the diodes can be connected using very thin electric currents, making the wires practically invisible. The red wire that connects the light sources is the principle component of the project, representing the synthesis of Davide Groppi's poetic vision.

**MAIORI**

La Lampe

La Lampe is built on an ethos of solar powered lights combined with LEDs. The outdoor lights present a sustainable energy device with an equally advanced hard body, creating versatile lighting objects. For this collection, Maiori applies its heritage as an outdoor furniture maker alongside a sustainable manufacturing process.

**B.LUX**

Overlay

B.Lux has launched a new collection of decorative lamps by Tim Brauns, who has recently joined the brand's team of collaborating designers. Overlay takes inspiration from Scandinavian design, with two table, one floor and three suspension versions. The variety of diameters make it possible to install Overlay in a variety of spaces, with the shade available in grey or cognac blown glass.

**ASTRO**

Edge Reader

Edge Reader by Astro presents original thinking for bedside lighting. With previous bedside luminaires offering either soothing mood light or practical reading light, the two are often presented separately. Edge Reader presents an original approach resulting in a new aesthetic, where the minimal white floating plane on which the reader is mounted comes to life at night. The base appears to float on light that is emitted from its edges, while both functions can be individually switched and LED lamps ensure minimal running costs.
